## MAYAN SPACE STATION

cymbals gongs and strings navigating through space  
we enter into the earth's atmosphere  
moving down towards valleys, caverns and back roads  
we see Celestial cotton fields  
the glow from these fields help to guide us  
over red bamboo and sugarcane villages  
we see people with big wide-brimmed straw hats  
backs bent, picking fruits and vegetables  
hungry, we land in a nearby field  
approaching these workers  
we ask them can we buy some of the delicious fruit  
they said they couldn't sell us any because they didn't have the right to do so  
the fruit belonged to the owners of the earth  
who live in big tall buildings, they owned all the wealth and controlled the keys  
to the jail cells where all the poor people were kept  
We had some left over magic so we used it to let all the poor people out of jail  
Millions of them piled into the spaceship and we took off.
